

iriComm 3.0

Specifically developed for rescue swimmers and SAR crews, the iriComm 3.0 gives you a winning combination of a waterproof and rugged headset with superior sound quality, effective noise reduction and great comfort for long working hours in the most extreme environments - allowing you to focus on what you do best - getting the job done.

iriComm 3.0 - the obvious choice for mission critical situations

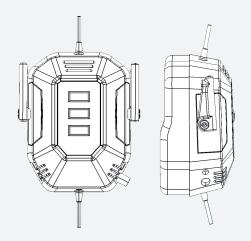

OPTIONS:

- Hear-Through
- 3 Mode LED light:
 - Dimmed light for map reading
 - High beam for orientation
- Strobe light for localization
- 3D Gel earpad

VARIATIONS:

- Headband or helmet mount
- Dynamic or electret microphone
- Wired or wireless headset

Superior sound quality

Whether you're part of a SAR, life boat or work boat team, it's vital that you and your crew can be heard and understood. By using high quality, no compromise components you are guaranteed superior sound quality. The high perfomance noise cancelling boom mic. enables your voice to be transmitted completely filtered out from even the loudest helicopter noise*.

For a full list of professional features, such as remote PPT directly from headset, voice prompts, peer to peer connectivity, dual pairing cell phone and more ...

please go to our website: www.iwcs.eu

Extremly rugged

With its unique soft-shell design iriComm 3.0 is engineered to provide a shock absorbing housing. The outer materials used have all been selected to withstand seawater and mud - providing a non corrosive casing. Maintenance wise, this means that you can actually put your headset in the dishwasher after use - it's that simple to clean.

Professional support

Our qualified technical staff are ready to help you, should you have any questions.
